

## INSERTING GLASS TUBES

WHEN ASSEMBLING THE TUBE VASES IN THE METAL STAND, LOCATE THE TWO RUBBER RINGS ON EACH TUBE. THESE ARE THE ADJUSTERS FOR THE VASE HEIGHTS. PLACE THE TWO RUBBER RINGS SIDE BY SIDE ON THE VASE AT THE DESIRED HEIGHT FOR THAT VASE. DO THIS PRIOR TO INSERTING THE GLASS INTO THE METAL STAND. THE VASES CAN BE ADJUSTED TO AN ARRAY OF HEIGHTS TO OFFER THE MOST FLEXIBILITY IN STYLE AND TO ACCOMMODATE A VARIETY OF FLORAL DESIGN OPTIONS.

## EXPERIMENT

TRY CHANGING THE HEIGHTS OF THE GLASS TUBE VASES AS ILLUSTRATED BELOW. SOME ARRANGEMENTS WORK WELL WITH A SINGLE BOUQUET OF FLOWERS WHILE ANOTHER SETUP MAY BE MORE APPEALING WITH LONG SINGLE FLOWERS.
