

**1)** Remove contents of box and identify parts.

**A**  
Bottom section.  
Tallest piece w/ 3 rings & a screw hole at the bottom.

**B**  
Middle section. 4 rings & a screw hole at top & bottom.

**C**  
Top section. 5 rings & same diameter at both ends. Screw hole on bottom.

**E**  
Cap. Spiral cap with narrow end that fits in top pole section.

**D**  
Base section. 3 heart shaped legs with center insert.

**2)** Set base on floor and insert piece **A** (keeping the side with the rivet facing up) into the center of piece **D**. Once in place, tighten the screw as indicated to the left with the arrow. Tighten screw until it stops turning, do not apply extra force.

**3)** Fit piece **B** into piece **A** making sure the end of piece **A** with the screw hole (indicated with arrow in image to right) is aligned with the screw hole of piece **A**. Insert and tighten screw. Fit pieces **A** & **B** together so there is no gap in the spiral. Refer to the image to the left.

**!** When connecting pieces **A**, **B** & **C**, Make sure screw holes on both pieces are properly aligned to ensure a secure hold. See illustration below.

**4)** Fit piece **C** into piece **B** following the same procedure as above making sure the screw holes line up accordingly. Once in place insert second screw and tighten.

**5)** Insert piece **E** into the top of piece **C** and slide into place.
